

Let the Sun light up your world

Renewable energy solutions for your business

[Go Solar](#)

What we do

Zua Energy provides solar power as a service to our customers. We install, own, and maintain solar panels on the customer's property and sells the electricity generated by the plant back to the customer. The power plant will be handed over to the customer at the end of the agreement period free of cost which makes them self sufficient in power generation.

Reliable technology, but too costly !!

This is the largest hurdle that prevent many industries and businesses interested in this technology from producing their own energy. Zua Energy is revolutionizing the market through our business model paving the way for every industry/business in our market to benefit from their own power generation systems with ZERO investment

Get the best accessibility and affordability to solar power
